ANIKET JADHAV

+91 9766995624 | aniketsjadhav4@gmail.com | LinkedIn | India

PROFESSIONAL SUMMARY

Aspiring Data Analyst with an engineering background and hands-on experience in SQL, Python, Advanced Excel, Power BI, data analysis, data validation, and visualization. Skilled in data cleaning, transformation, exploratory data analysis, KPI analysis, dashboard development, and generating actionable business insights. Strong analytical and problem-solving abilities with attention to detail, documentation, and data-driven decision-making.

EDUCATION

Tatyasaheb Kore Institute of Engineering and Technology, Warananagar — Warananagar, Maharashtra
Bachelor of Technology in Civil Engineering — 2023 – 2026

Government Polytechnic, Karad — Karad, Maharashtra
Diploma in Instrumentation Engineering — 2020 – 2023

Maharashtra State Board — Maharashtra, India
SSC (10th) — 2020

TECHNICAL SKILLS

- **Data Analytics:** SQL, Python, Advanced Excel, Power BI, Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis, KPI Analysis
- **Python Libraries:** Pandas, NumPy, Matplotlib, Scikit-learn
- **Machine Learning:** Regression, Classification, K-Means Clustering, Random Forest, Model Evaluation
- **Business Analytics:** Sales Analysis, Demand Forecasting, Customer Segmentation, Customer Churn Analysis, Dashboard Development, Business Insights

DATA ANALYTICS PROJECTS

Sales Analytics & Demand Forecasting
- Analyzed sales, profit, regional, and product performance using Python, SQL, and Excel.
- Built KPIs, identified monthly trends, and applied regression techniques for sales forecasting.
- Designed business-focused visualizations and dashboards for data-driven decision-making.

Customer Segmentation
- Applied K-Means clustering to segment customers based on income and spending behavior.
- Used the Elbow Method and visualizations to identify meaningful customer groups and business insights.

Customer Churn Prediction
- Built a classification model using Random Forest to predict customer churn.
- Performed data preprocessing, model evaluation, confusion matrix analysis, and feature importance analysis.

Concrete Compressive Strength Prediction
- Developed a regression model to predict concrete compressive strength from material composition and age.
- Compared actual versus predicted values and analyzed important features using visualizations.

EXPERIENCE

Freelance Data Analyst | Self-Employed | July 2026 – Present
- Deliver end-to-end data analysis projects using Python, SQL, Excel, and Power BI.
- Clean, transform, validate, and analyze datasets to identify trends, data quality issues, and actionable insights.
- Develop dashboards and reports to communicate KPIs and findings clearly for data-driven decision-making.
- Prepare and maintain analysis documentation and present findings through business-focused visualizations.

R. C. Bidiace Civil Contractor | Civil Engineering Intern | Jan 2026 – May 2026
- Worked on construction activities including site supervision, foundation work, reinforcement checking, and project monitoring.
- Maintained daily site records and reports and coordinated labour and materials.
- Supported quality and safety practices during construction activities.

LK Construction | Site Trainee | 1 Month
- Assisted in day-to-day site supervision and gained practical exposure to construction workflow and safety practices.

STRENGTHS

Hard-working and disciplined • Quick learner • Strong analytical and problem-solving skills • Attention to detail • Team-oriented
